

Listen and learn. That's the first step in our sales process. Our experienced sales representatives then turn your specific requirements into a packaging program designed to suit your needs. And our customer service team is thoroughly versed in our product offering and packaging solutions, ready to answer any questions you may have at any time. We strive to turn business relationships into long-term partnerships.

Sales and Customer Service

At National Carton and Coating we think from the inside out, specializing in full-service custom packaging solutions, from concept to completion. We start with an upfront audit, gathering input directly from you regarding your application, specs, special requirements, filling processes and budget. Our expert designers and engineers can create precise CAD drawings to meet your exact specs, as well as samples of your custom carton for approval.

Design and CAD Support Services

Whether you need high-end seven-color graphics or simple designs, we have the in-house capabilities to go from computer to press in less than an hour. So your new packaging can be on line in no time.

Digital Prepress

We offer the latest in pre press technology. Using files provided via our FTP site, cd's, e-mail or an upload to a third party site we can access and convert the files through our digital work flow. We can make any necessary changes in the art afterwards, we can provide you with a PDF for content review and a color accurate Epson proof for final approval. Once we have the go ahead we convert the files directly to plates ensuring accurate printing to the approved proof.

Die Engineering

On-site expertise, superior results. Whether it's a stock order or custom design, we create and use our own CAD-machined dies in a state-of-the-art facility, designed by our die and fabricating staff. Our CAD-machined dies and tooling yield quicker make-readies and ensure consistent results on machine-filled packaging lines.

Plate making, Pre-press and Printing

We're in the business of "big" and "small." With seven-color 43" x 60" and 28" x 40" offset printing equipment, plus additional two-color presses all onsite, and the ability to make all printing plates in-house, we're equipped to handle a wide range of production. This insures consistent quality - run after run.

Die Cutting and Scoring

A vision for precision. No package is complete without precise die cutting and scoring, whether it's for hand-filled or machine-filled cartons. With three high-speed Bobst die cutting machines - the best in the business - our operators keep jobs running quickly and smoothly.

Finishing, Gluing and Packaging

We finish the job right. With three gluing and window machines, we have the precise equipment to manufacture any style carton you need. And we have the staff in place to complete your package on time, on budget, to your exact specifications.

Shipping and Warehousing

Your stock is in stock. We manage and maintain 11,000 pallets of inventory in 55,000 square ft. of warehouse space. Using a custom computerized inventory system, we track quantities run, quantities in stock and orders waiting to be run. We can ship on demand or as needed, based on customer production usage. And our additional West Coast distribution site allows us to serve 13 western states.
